Copyright

Submission of a manuscript implies that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review or thesis), that it is not under consideration for publication elsewhere, that its publication has been approved by all the authors and by the responsible authorities – tactily or explicitly – in the institutes where the work was carried out and that, if accepted, it will not be published elsewhere in the same form, in either the same or another language, without the consent of the copyright holders.

By submitting a manuscript, the authors agree that the copyright for their article is transferred to the publisher if and when the article is accepted for publication. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform, electronic data base, video disks, or any other reproductions of similar nature, and translations.

Photographic reproduction, microform, electronic data base, video disks, or any other reproduction of text, figures, or tables from this journal is prohibited without permission obtained from the publisher.

The use of general descriptive names, trade names, trade marks, etc., in this publication, even if the former are not specifically identified, is not to be interpreted as exempt from the relevant protective laws and regulations. While the advice and informatrion in this journal is believed to be true and accurate at the date of going to press, neither the authors nor the editors nor the publisher can accept any legal responsibility for any errors or omissions that may be made. The publisher makes no warranty, express or implied, with respect to the material contained herein.

Special regulations for the USA

Photocopies may be made for personal or internal use beyond that permitted by Section 107 or 108 of the U.S. Copyright Law, provided a fee is paid. This fee is $ 0.20 per page or a minimum of $ 1.00 if an article consists of less than five pages. Please pay this fee to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA, stating the ISSN 0175-7598, volume, and first and last page numbers of each articles copied.

The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

Other regulations

Authors of this journal can benefit from library and photocopy fees collected by VG WORT if certain conditions are met. If an author lives in the Federal Republic of Germany or in West Berlin it is recommended that he contact Verwertungsgesellschaft WORT, Abteilung Wissenschaft, Goethestrasse 49, D-8000 München 2, for detailed information.

Contents

Biotechnology

G. Amin, P. Standaert, H. Verachtert: Effects of metabolic inhibitors on the alcoholic fermentation by several yeasts in batch or in immobilized cell systems 91

T. G. Baklashova, K. A. Koshcheenko, G. K. Skryabin: Hydroxylation of indolyl-3-acetic acid by immobilized mycelium of *Aspergillus niger* 217

S. A. El-Temtamy, S. A. Khalil, A. A. Nour-El-Din, A. Gaber: Oxygen mass transfer in a bubble column bioreactor containing lysed yeast suspensions 376

E. I. Emanuilova, K. Toda: α-Amylase production in batch and continuous cultures by *Bacillus caldolyticus* 301

M. B. Fadda, M. R. Dessi, R. Maurici, A. Rinaldi, G. Satta: Highly efficient solubilization of natural lignocellulosic materials by a commercial cellulase immobilized on various solid supports 306

R. K. Finn, S. Bringer, H. Sahm: Fermentation of arabinose to ethanol by *Sarcina ventriculi* 161

M. Fujimura, J. Kato, T. Tosa, I. Chibata: Continuous production of L-arginine using immobilized growing *Serratia marcescens* cells: Effectiveness of supply of oxygen gas 79

R. D. Gehle, K. Schügerl: Penicillin recovery from aqueous solutions by continuous foam flotation 373

M. Hossain, J. D. Brooks, I. S. Maddox: The effect of the sugar source on citric acid production by *Aspergillus niger* 393

C. T. Hou: Propylene oxide production from propylene by immobilized whole cells of *Methylosinus* sp. CRL 31 in a gas-solid bioreactor 1

B. Kopp, H. J. Rehm: Semicontinuous cultivation of immobilized *Claviceps purpurea* 141

W. Kurzątkowski, W. Kurylowicz, A. Penyige: Radioactive penicillin G production by immobilized fungal vesicles 312

J. H. T. Luong, M. C. Tseng: Process and technoeconomics of ethanol production by immobilized cells 207

J. Margalit, A. Markus, Z. Pelah: Effect of encapsulation on the persistence of *Bacillus thuringiensis var. israelensis*, serotype H-14 382

R. Materassi, M. Tredici, W. Balloni: *Spirulina* culture in sea-water 384

K. Nakamichi, K. Nabe, S. Yamada, T. Tosa, I. Chibata: L-Phenylalanine formation from acetamidocinnamic acid by newly isolated bacteria 100

J. N. Nigam, J. Lehmann, K. Gerth, H. Piehl, R. Schultze, W. Trowitzsch: Feeding strategy for the production of the new antibiotic myxovirescin A from *Myxococcus virescens* (Myxobacterales) 157

A. Pareilleux, R. Vinas: A study on the alkaloid production by resting cell suspensions of *Catharanthus roseus* in a continuous flow reactor 316

V. B. Rale: SCP from pineapple (*Ananas sativa* Schutt). Cannery effluents 106

G. H. Schoutens, M. C. H. Nieuwenhuizen, N. W. F. Kossen: Butanol from whey ultrafiltrate: batch experiments with *Clostridium beyerinckii* LMD 27.6 203

H. Schütte, W. Hummel, M.-R. Kula: L-2-hydroxyisocaproate dehydrogenase – A new enzyme from *Lactobacillus confusus* for the stereospecific reduction of 2-ketocarboxylic acids 167

I. Takata, T. Tosa, I. Chibata: Stability of fumarase activity of *Brevibacterium flavum* immobilized with κ-carrageenan and Chinese gallotannin 85

B. Thomasset, J.-N. Barbotin, D. Thomas: The effects of high concentrations of salts on photosynthetic electron transport of immobilized thylakoids: Functional stability 387

M. Veelken, H. Pape: Production of nikkomycin by immobilized *Streptomyces* cells – Physiological properties 146

J. Votruba, V. Běhal: A mathematical model of kinetics of the biosynthesis of tetracyclines 153

H. Weber, K. D. Kulbe, H. Chmiel, W. Trösch: Microbial acetate conversion to methane: kinetics, yields and pathways in a two-step digestion process 224

E. K. C. Yu, L. Deschatelets, J. N. Saddler: The combined enzymatic hydrolysis and fermentation of hemicellulose to 2,3-butanediol 365

M. Zavanella, A. Nigrelli, F. Ciuchini, V. Sala: Production and control of freeze-dried *Brucella abortus* strain 19 vaccine by using cells produced by fermentation units 229

Industrial microbiology

D. Atlan, R. Portalier: Optimized extracellular production of alkaline phosphatase by *Iky* mutants of *Escherichia coli* K12 5

R. Blasig, W.-H. Schunck, W. Jockisch, P. Franke, H.-G. Müller: Degradation of longchain n-alkanes by the yeast *Lodderomyces elongisporus*. I. Products of alkane oxidation in whole cells 241

E. Blickstad: The effect of water activity on growth and end-product formation of two *Lactobacillus* spp. and *Brochothrix thermosphacta* ATCC 11509^T 13

J. Heim, Y.-Q. Shen, S. Wolfe, A. L. Demain: Regulation of isopenicillin N synthetase and deacetoxycephalosporin C synthetase by carbon source during the fermentation of *Cephalosporium acremonium* 232

A. Nipkow, W. Beyeler, A. Fiechter: An improved synthetic medium for continuous cultivation of *Zymomonas mobilis* 237

G. J. Sewell, C. J. Soper, R. T. Parfitt: The screening of some microorganisms for their ability to N-dealkylate drug molecules 247

L. Viikari: Formation of levan and sorbitol from sucrose by *Zymomonas mobilis* 252

Applied microbiology

G. Annison, I. Couperwhite: Consequences of the association of calcium with alginate during batch culture of *Azotobacter vinelandii* 321

O. Asperger, A. Naumann, H.-P. Kleber: Inducibility of cytochrome P-450 in *Acinetobacter calcoaceticus* by n-alkanes 398

M. J. Beker, J. E. Blumbergs, E. J. Ventina, A. I. Rapoport: Characteristics of cellular membranes at rehydration of dehydrated yeast *Saccharomyces cerevisiae* 347

W. Beyeler, P. L. Rogers, A. Fiechter: A simple technique for the direct determination of maintenance energy coefficient: An example with *Zymomonas mobilis* 277

P. M. Bruinenberg, P. H. M. de Bot, J. P. van Dijken, W. A. Scheffers: NADH-linked aldose reductase: they key to anerobic alcoholic fermentation of xylose by yeasts 256

D. A. S. Callieri, C. G. Núñez, J. C. Diaz Ricci, L. Scidá: Batch culture of *Candida utilis* in a medium deprived of a phosphorous source 267

Z. Dermoun, C. Gaudin, J. P. Belaich: Microcalorimetric study of aerobic growth of *Cellulomonas* sp. 21399 on various carbohydrates 281
J. C. du Preez, B. A. Prior, A. M. T. Monteiro: The effect of aeration on xylose fermentation by *Candida shehatae* and *Pachysolen tannophilus*. A comparative study 261
K. Gerth, W. Trowitzsch, G. Piehl, R. Schultze, J. Lehmann: Inexpensive media for mass cultivation of myxobacteria 23
R. Hommel, H.-P. Kleber: Oxidation of longchain alkanes by *Acetobacter rancens* 110
B. Koliander, W. Hampel, M. Roehr: Indirect estimation of biomass by rapid ribonucleic acid determination 272
T. Matsunaga, R. Tomoda, H. Matsuda: Photomicrobial electrode for selective determination of sulphide 404
S. Mauersberger, W.-H. Schunck, H.-G. Müller: The induction of cytochrome P-450 in the alkane-utilizing yeast *Lodderomyces elongisporus:* Alterations in the microsomal membrane fraction 29
W. Okazaki, T. Akiba, K. Horikoshi, R. Akahoshi: Production and properties of two types of xylanases from alkalophilic thermophilic *Bacillus* spp. 335
S. Passi, M. Nazzaro-Porro, C. Fanelli, A. A. Fabbri, P. Fasella: Role of lipoperoxidation in aflatoxin production 186
B. C. Saha, S. Ueda: Production and characteristics of inhibitory factor of raw starch digestion from *Aspergillus niger* 341
H. Sandoval, A. Aguilar, C. Paniagua, J. F. Martin: Isolation and physical characterization of plasmid pCCI from *Corynebacterium callunae* and construction of hybrid derivatives 409
B. Sonnleitner, A. Fiechter, F. Giovannini: Growth of *Thermoanaerobium brockii* in batch and continuous culture at supraoptimal temperatures 326
C. Verduyn, T. P. L. Zomerdijk, J. P. van Dijken, W. A. Scheffers: Continuous measurement of ethanol production by aerobic yeast suspensions with an enzyme electrode 181
E. Watanabe, K. Toyama, I. Karube, H. Matsuoka, S. Suzuki: Enzyme sensor for hypoxanthine and inosine determination in edible fish 18
J. Woodrow, K. Spear: The use of derivative spectrophotometry for the rapid measurement of substrate and product concentration in fermentation 177

Environmental microbiology

H. Grueninger, B. Sonnleitner, A. Fiechter: Bacterial diversity in thermophilic aerobic sewage sludge. III. A source of organisms producing heat-stable industrially useful enzymes, e.g., α-amylases 414
G. Scheff, O. Salcher, F. Lingens: *Trichococcus flocculiformis* gen. nov. sp. nov. A new grampositive filamentous bacterium isolated from bulking sludge 114
P. Timmermans, A. Van Haute: Influence of the type of organisms on the biomass hold-up in a fluidized-bed reactor 36
I. Trick, F. Lingens: Characterization of *Herpetosiphon spec.* – A gliding filamentous bacterium from bulking sludge 191
I. Trick, O. Salcher, F. Lingens: Characterization of filament forming *Bacillus* strains isolated from bulking sludge 120
E. Van den Eynde, L. Vriens, M. Wynants, H. Verachtert: Transient behaviour and time aspects of intermittently and continuously fed bacterial cultures with regard to filamentous bulking of activated sludge 44
E. Van den Eynde, L. Vriens, P. De Cuyper, H. Verachtert: Plug flow simulating and completely mixed reactors with a premixing tank, in the control of filamentous bulking 288
S. Vrati: Single cell protein production by photosynthetic bacteria grown on the clarified effluents of biogas plant 199
F. X. Wildenauer, K. H. Blotevogel, J. Winter: Effect of monensin and 2-bromoethanesulfonic acid on fatty acid metabolism and methane production from cattle manure 125

Short communications

G. Auling, K.-H. Bellgardt, H. Diekmann, M. Thoma: Dynamics of growth in batch and continuous cultures of *Saccharomyces cerevisiae* during shifts from aerobiosis to anaerobiosis and reverse 353
S. G. Borkar, J. P. Verma: Effect of phenolic substances on pigmentation and pathogenicity of *Xanthomonas campestris* pv. *malvacearum* 435
M. de la Torre, C. C. Campillo: Isolation and characterization of a symbiotic cellulolytic mixed bacterial culture 430
H. Eikmeier, F. Westmeier, H. J. Rehm: Morphological development of *Aspergillus niger* immobilized in Ca-alginate and K-carrageenan 53
F. Fatichenti, G. A. Farris, P. Deiana, S. Ceccarelli: Malic acid production and consumption by selected of *Saccharomyces cerevisiae* under anaerobic and aerobic conditions 427
U. Fingerhut, L. E. Webb, C. J. Soeder: Increased yields of *Rhizobium japonicum* by an extract of the green alga, *Scenedesmus obliquus* (276–3a) 358
A. J. Hacking, I. W. F. Taylor, C. M. Hanas: Selection of yeast able to produce ethanol from glucose at 40° C 361
C. T. Kelly, A. M. Nash, W. M. Fogarty: Effect of manganese on alkaline phosphatase production in *Bacillus* sp. RK11 61
J. L. Lequerica, S. Vallés, A. Flors: Kinetics of rice straw methane fermentation 70
K. S. Low, P. L. Rogers: The macromolecular composition and essential amino acid profiles of strains of *Zymomonas mobilis* 75
F. Monot, J.-M. Engasser, H. Petitdemange: Influence of pH and undissociated butyric acid on the production of acetone and butanol in batch cultures of *Clostridium acetobutylicum* 422
H. Rodriguez, O. Volfoá: Formation and localization of cellulases in Cellulomonas culture on bagasse 134
K. Shailubhai, N. N. Rao, V. V. Modi: Treatment of petroleum industry oil sludge by *Rhodotorula sp.* 437
N. Tanaka, Y. Fukunaga, S. Hasezawa, K. Syono, C. Matsui: Endocytic uptake of *Escherichia coli* spheroplasts by *Neurospora crassa* slime cells. An ultrastructural study 296
R. P. Tracey, H. J. J. van Vuuren, D. S. du Toit: A method for the detection of *Issatchenkia orientalis* in a baker's yeast factory 131
S. O. Yanagi, I. Takebe: An efficient method for the isolation of mycelial protoplasts from *Coprinus macrorhizus* and other basidiomycetes 58
G. Younes, J.-M. Nicaud, J. Guespin-Michel: Enhancement of extracellular enzymatic activities produced by immobilized growing cells of *Myxococcus xanthus* 67
